

Growing Climate Solutions

Path to Positive™

Southwest Florida

LEADERSHIP CIRCLE PRINCIPLES

As visionary leaders of business, civic, government, health, education, faith, and community organizations, we take shared responsibility for protecting our natural environment and preserving the current and future prosperity and health of our region.

Growing Climate Solutions: Path to Positive Southwest Florida is a regional initiative aimed to engage our diverse local communities to grow public support and political will for climate solutions and resilience. As Leadership Circle members we form a network of local organizations, leaders, and citizens that support the protection of our natural environment, the prosperity and health of our community, and the education and empowerment of all community members to engage and act on solutions in the face of a changing climate and its impacts in Southwest Florida.

As a Leadership Circle member, I commit to educate myself and to help others understand the links between climate, health, and prosperity; the spectrum of climate solutions and their costs and benefits; and, the opportunities and responsibility to act and advocate.

I support the mission and principles of Growing Climate Solutions: Path to Positive Southwest Florida and will play an active role in cultivating its partner network. I will work to inspire my colleagues, the organizations which I lead, policymakers and the public, to act on climate solutions that will protect our natural resources, improve the health of our families and communities, and ensure a prosperous, just, and resilient future for our region.
